AFT Fathom derives physical properties from one of five sources. The first is the standard AFT Fathom set of incompressible fluids which contains data for about 70 common fluids (called AFT Standard). The second is User Specified Fluid, for which data is provided by the user. The third is water (and steam) data from the ASME Steam tables.

AFT Fathom Quick Start Guide - English Units

AFT Arrow is used to calculate pressure drop and flow distribution in gas piping and ducting systems. Settling Slurries. An add-on module for AFT Fathom or AFT Impulse that allows engineers to model the effects of pumping fluids containing settling solids using the Wilson/GIW method.
