Clock Of The Long Now

The Clock of the Long Now, also called the 10,000-year clock, is a mechanical clock under construction that is designed to keep time for 10,000 years. It is being built by the Long Now Foundation. A two-meter prototype is on display at the Science Museum in London. As of June 2018, two more prototypes are on display at The Long Now Museum & Store at Fort Mason Center in San Francisco. The project was conceived by Danny Hillis in 1986. The first prototype of the clock began

The full scale 10,000 Year Clock is now under construction. While there is no completion date scheduled, we do plan to open it to the public once it is ready. The essay below by Long Now board member Kevin Kelly discusses what we hope the Clock will be once complete. This is one of several projects ...

Introduction - 10,000 Year Clock - The Long Now

The Clock of the Long Now is an attempt by a group of forward thinkers --engineers, futurists, visionaries--to create a device to stimulate people to take a longer view of time. An actual physical clock that will "time" the next 10,000 years. Why ten thousand? Because 10,000 years ago, mankind invented agriculture, and with it, civilization began.
