It generally is recommended that women who are pregnant with multiples gain more weight than women who are pregnant with one fetus. An extra 300 calories a day is needed for each fetus. For instance, if you are pregnant with twins, you need an extra 600 calories a day. For triplets and more, weight gain should be individualized.

Multiple Pregnancy | ACOG

Fraternal twins — the most common kind of twins — occur when two separate eggs are fertilized by two different sperm. Each twin has his or her own placenta and amniotic sac. The twins can be two girls, two boys, or a boy and a girl. Identical twins occur when a single fertilized egg splits and develops into two fetuses.
