Certain individuals have physical or behavioral traits that suit their environment. Because of these traits, the individuals are more likely to survive and reproduce offspring with the same traits. Over time, the number of individuals possessing the traits exceeds the number of individuals lacking the traits, which changes the nature of the population.

Skills Worksheet Active Reading

Adapted from Holt Biology 2008. Lamarckian Inheritance. Jean Baptiste de Lamarck - types of organisms change over time & new types of organisms are modified descendants of older types. To explain how species change, Lamarck incorrectly hypothesized that traits were acquired through an organism's experience or behavior and were passed on to its offspring.
