In his book Majestic Lights, Eather (1980) presents several quotes from the Bible that most likely refer to aurora. The first recorded use of the words "northern lights" to describe the aurora was in 1230, in a book titled The King's Mirror. The author wrote the book to prepare Norwegian King Magnus Lagabøte for his duties as a ruler.

Northern Lights in Majestic Iceland - Borton Overseas

Oxygen emits either a greenish-yellow light (the most familiar color of the aurora) or a red light; nitrogen generally gives off a blue light. The blending of these colors can also produce purples, pinks, and white. The oxygen and nitrogen also emit ultraviolet light, which can be detected by special cameras on satellites but not by the human eye.

Print sources - Geotail

In fact, the aurora borealis happens when charged solar particles meet certain atmospheric gasses and the Earth's magnetic field. Technically the phenomenon behind the northern lights can happen...
