proposes that different pitches activate different places on the cochlea's basilar membrane; this is the PLACE theory. This theory has difficulty accounting for how we hear LOW-pitched sounds, which do not have such localized effects. 11.

UNIT 4: SENSATION AND PERCEPTION

Perception refers to the way sensory information is organized, interpreted, and consciously experienced. Perception involves both bottom-up and top-down processing. Bottom-up processing refers to the fact that perceptions are built from sensory input. On the other hand, how we interpret those sensations is influenced by our available knowledge, our experiences, and our thoughts.
