Start studying Exercise 37- Respiratory System Physiology. Learn vocabulary, terms, and more with flashcards, games, and other study tools.

### **Exercise 37- Respiratory System Physiology Flashcards ...**

18 breaths per min. Both the rate and depth can be changed by output from the respiratory centers in the brain stem (medulla oblongata). During heavy exercise air flow can increase 20-fold and blood flow 3-fold. To expel such increased volumes, active exhalation is required in which abdominal muscles and internal intercostals muscles contract.

Nurses need to understand the anatomy and physiology of normal breathing to measure respiratory rate and interpret findings. The second in our five-part series on respiratory rate describes the process of breathing and how it is affected by ill health. Citation: Hartley J (2018) Respiratory rate 2: anatomy and physiology of breathing.
