required to run wires and cables is built into the 3D model of the connector, or mechanism that will receive power. CP's (Control Points), are generated by the user to identify the pins and the associated callouts.

### **SOLIDWORKS Electrical Professional vs SOLIDWORKS Routing**

## Download Ebook Solidworks Routing Manual French

SOLIDWORKS Routing is driven from a database, once you have selected the correct schedule you are using it will automatically pick up the relevant parts to that schedule, for example if you use an edge flange Sch40 all the pipes and elbows will be the same schedule. It then assigns the relevant routing components to the 3D sketch.
